

The Digital Advantage of 247

- **No Tapes – records to 160Gb/1250Gb Hard Drive**

1-2 camera systems 160GB hard drive, 3-4 camera systems 250GB hard drive.

- **200-400 hours of record time instead of 8**

Record 2 months of video with digital recorders instead of days with VHS recorders.

- **Hot swappable hard drive – no corrupt files**

Hard drive may be swapped out while system is in use. Files will not become corrupt.

- **No hard driver reader needed**

No extra equipment needed to download video files. Hard drive connects directly to your computer using USB cable.

- **Easy event viewing with memory stick**

Retrieve video events in seconds using a 2GB memory stick. Just plug the stick into the front of the recorder and download up to 25, 5-minute events at once for easy viewing on your computer.

- **4-Channel audio**

Now record audio from all four cameras on your bus: simultaneously!

- **GPS Module with Mapping Software (MiniTRACK)**

New GPS Module tracks bus speed and much more. On maps of your community, track speed violations, stop times, idling times, stop arm violations and more. Create driver reports in seconds. Know your bus stops; see your bus stops – all at the push of a button.

- **Event Marker & full sensor monitoring**

Mark any on-bus event (5 minutes of video) with the push of a button for easy retrieval during playback. Monitor driver activity such as braking, warning lights and stop-arm deployment—all standard.

- **Save any portion of a video file in seconds**

Save just what you need. No wasted hard drive space. Quick and easy to use software gets you exactly what you want in seconds. Pick the month, pick the day, save your file.

- **Burn to disc, send in e-mail, drop in share folder**

Retrieve your file then burn it to disc, e-mail it or place it in the district's share folder for authorized users to view in just minutes.

- **2-Channel system available – much more cost effective**

Why buy a 4-channel system if you are only going to use two cameras? Utilize the only 2-channel simultaneous recording system on the market today for a much more cost effective solution.

- **Smallest DVR with no lock box**

At approximately 7.6" x 6.9" x 2", the 24/7 DVR is the smallest digital recorder on the market. No lock box makes it the simplest to install and easiest to find room for.

- **Drive-Safe G-Force Device**

Track bus driver activity automatically with our new state-of-the-art G-Force device that measures hard braking, excessive acceleration and extreme left and right turns.

- **Touchdown Wireless Platform**

Hands-free WIFI systems now available. Collect video files, retrieve GPS data and monitor the health of your systems automatically. The Touchdown wireless server allows you to do all this and more, from the comfort of your office. User intervention on the bus is eliminated.
